

## Deltek Costpoint Business Intelligence

Maximize profit, spot exceptions and get to root of the problem – faster

Does your organization have the information it needs, when it's needed, to make the right decisions to move your business forward? Are you able to answer critical questions about your business' performance quickly and confidently? In today's ultra-competitive government contracting environment, many organizations are using multiple sources of data and many spreadsheets to answer these questions, leading to manual, time-consuming, and ineffective decision making across the organization.

The ability to harness project data with speed, agility, accuracy and trust can make the difference between profitable projects and unprofitable projects. With Costpoint the modern contractor gets the best data of any project-based ERP and the best business intelligence. Executives and project managers get truer insight into project performance to increase profits and control costs on every project in their portfolio. You will turn your organizational data into knowledge, so you can make smarter, information-based decisions that drive your business forward.

Track multiple key performance indicators in a single view – on any device.

## Key Features:

- Advanced visualizations in reports and dashboards
- Budget/Forecast vs. Actual comparisons
- Consistent web-experience on all devices
- Consolidated view of projects
- Drag and drop dashboard creation
- Easily locate, build, run, and schedule reports you can trust – all in a single location
- Fully integrated with Costpoint, including security
- Interactive report authoring
- Powerful and contextualized smart search
- Real-time view of project information
- Report templates that are easy-to-customize
- View project trends over multiple years and periods
- Web-based data modeling and ability to map data from multiple sources, including Excel
